COLABORACIÓN ENTRE UNIVERSIDADES CHILENAS: ALGUNOS EJEMPLOS CONCRETOS

Fernando Montes S. J.
Rector de la Universidad Alberto Hurtado.

ABSTRACT

This study shows the difficulties Chile faces when trying to generate a collaborative culture among universities. In spite of it, it presents four examples of collaborative agreements between the University Alberto Hurtado and other higher education institutions.

First of all, the broad project on social responsibility "The University Builds the Country"; in second place, a degree offered together with the Catholic Universities of Valparaiso and of Santiago, on Development and Poverty; thirdly, possibly a doctor's degree together with the Universities of Concepción and Catholic of the North, and, finally, the general collaboration agreement with the Catholic University of Chile.
