ABSTRACT

During the last ten years, the Investigation Police Forces’ educational system has experienced a great advance, which has considerably improved its quality. Therefore, its educational activity is widely recognized due to its humanistic-scientific approach; because it considers the cultural context and stimulates the social, artistic and sports activities of all of institution’s members.

In the first place, after a brief account of the legal frame, this paper unfolds the investigation police’s philosophy, offers an outline of its educational structure and its graduates’ profiles.
